25X1

A section near the top of the new Slapy (N49-49, E14-24) Dam gave way due to faulty construction, killing seven persons, during the night of 30 March 1955. The dam gates were opened to relieve the pressure, causing the level of the Vltava River to rise.

25X1

Comment. The rise of the level of the Vltava River was noticeable in Prague.
